Deliver Business Value Faster by Unleashing Your Human Capital

Simon Black, Mendix & Westminster University & Chubb Insurance

Professional developers, citizen developers, product owners and end users all bring unique skills to the table when it comes to delivering business value. Learn how to harness all that talent and knowledge in this session, where we'll explain how Mendix's dual IDE approach allows developers from a range of different skill levels to build business-altering application. Session will include real life example of how Chubb Insurance has worked with Westminster University and their graduate scheme to enhance and leverage app dev skills of the future

MAKE AT SCALE

Microservices, Macro results- The what, Why, When and How of using Mendix and Microservices

Andreas Lennevi, Mendix

In this session, you'll learn how to scale your Mendix efforts using microservices. We'll share the benefits and trade-offs of applying this architectural pattern with the Mendix platform to achieve unprecedented productivity.
