

Mendix Cloud

Get the most out of Mendix with Mendix Cloud

For customers who would rather focus on innovating and competing with apps than worrying about technical details, there is a perfect choice: Mendix Cloud.

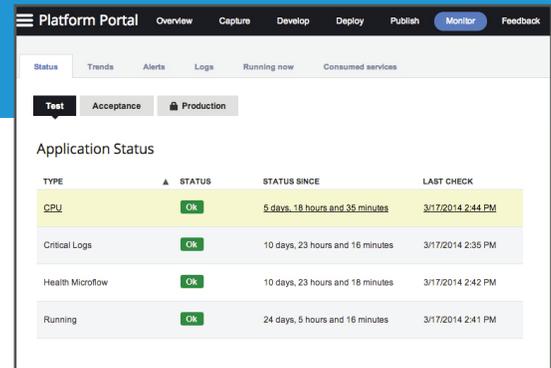

While Mendix supports multiple deployment scenarios, including on-premise, Mendix Cloud offers significant advantages in terms of ease of use, economies of scale and speed of innovation.

Mendix Cloud is the complete infrastructure provided by Mendix to run the Mendix App Platform and the applications built on the platform. The configuration is standardized, optimized and fully automated. We use multiple datacenters across the world, which meet the highest security standards. Mendix has achieved ISAE 3402 assertion and provides SLA's with an uptime guarantee of up to 99.95%.

Key Benefits

Our relentless pursuit to optimize the application deployment and management experience while meeting the highest security standards through Mendix Cloud offers customers significant advantages.

- ✓ **Ease of use**
Leverage self-service capabilities that are designed with simplicity in mind, putting app deployment and management capabilities just one click away.
- ✓ **Highest level of security**
Trust critical patches and compliance with security standards to us. With hundreds of enterprise customers running mission-critical applications on Mendix Cloud, we're dedicated to maintaining the highest level of security.
- ✓ **Economies of scale**
Benefit from economies of scale as we relentlessly drive standardization and optimization of the platform services and underlying infrastructure for hundreds of enterprise customers.
- ✓ **Speed of innovation**
Let us operate the platform 24/7 so you can focus on your business. Don't worry about anything else other than using Mendix to innovate and compete with apps.

Mendix Cloud Features

Instant Deployment

Deploy your apps with one click to Test, Acceptance or Production environments. The application resources are automatically provisioned.

Security

Ensure the utmost security of your applications with strong (certificate based) authentication and Single Sign On support, role-based access, secure connections, IP filtering and contained environments.

Scalability

Easily scale the deployment of your applications in the Mendix Cloud as your users and usage grows.

Backup

Backups are automatically created daily and stored at different locations. Easily download your backups to access your data.

Monitoring & Alerting

Gain insight into application performance with powerful dashboards, including trend analysis, alerting, logging and even real-time views of running application processes.

Integration

Leverage the platform's openness through web services and web sockets for high-volume and high-performance integrations. Run 3rd party Java libraries as part of your application.

Custom URLs

Access your apps via every device through custom URLs. It's even possible to use your own domain name.

Application Management

Manage your applications and application environments in one centralized place.

Additional Services

In the addition to the standard Mendix Cloud services, Mendix offers optional services to meet specific customer requirements. Examples are:

- Low-level configuration of applications
- Data replication with flexible data recovery points
- Fall back environment
- Certificate-based authentication – Mendix side

Mendix is the app platform as a service company for the enterprise. We enable companies to build, integrate and deploy web and mobile applications faster and with better results, effectively driving ROI in days, not months. For more information, visit www.mendix.com.
